SUMMARY

Data Analyst with expertise in statistical modeling, Python-based data pipeline development, and quantitative analysis of large-scale datasets. Proven track record of building predictive models, automating workflows (reducing processing times by 40%), and delivering actionable insights to stakeholders. Currently completing a Master's in Data Science at the University of Pittsburgh with hands-on experience in SQL, machine learning, and data visualization. Strong background in military leadership and process optimization (Lean Six Sigma).

TECHNICAL SKILLS

- **Programming & Data Analysis:** Python (pandas, NumPy, scikit-learn, matplotlib, seaborn), R, SQL
- **Statistical & Predictive Modeling:** Regression analysis, machine learning, hypothesis testing, model validation, feature engineering
- **Data Tools:** Excel (pivot tables, VLOOKUP, advanced formulas, data visualization), SQL (queries, joins, aggregations)
- **Visualizations:** matplotlib, seaborn, Tableau (learning), Power BI (learning)
- **Database Management:** Large-scale dataset manipulation, ETL workflows, data cleaning, data quality assurance
- **Process Improvement:** Lean Six Sigma (Yellow Belt), project workflow optimization

PROFESSIONAL EXPERIENCE

Research Technician – Cleveland Clinic Foundation

(Mar 2025 – Present)

- Design and implement predictive models using Python (scikit-learn) and statistical methods to analyze high-dimensional clinical datasets (700+ patient records), applying machine learning techniques for biomarker discovery and treatment response prediction.
- Manage a database of 700+ patient records with complex data structures, ensuring data quality, integrity, and compliance with standards while collaborating cross-functionally with clinical teams to support data-driven decision-making.
- Built automated data pipelines in Python (pandas, NumPy) that reduced data preparation time by 40%, processing large-scale datasets through ETL workflows to enable rapid analysis and standardized reporting for stakeholders.
- Collaborate cross-functionally with oncology researchers, clinical staff, and data management teams, providing analytical expertise and technical support that enables timely project completion and research advancement.
- Create data visualizations and statistical reports (matplotlib, seaborn) communicating complex findings to stakeholders and project sponsors for decision-making and publication.
- Perform ad hoc quantitative analysis to answer research questions, retrieving and manipulating data from multiple sources using SQL, Python, and applying statistical methods to validate hypotheses.

Research Assistant – Kent State University

(Aug 2023 – Oct 2024)

- Led the statistical analysis of material properties data resulting in publication in a high-impact journal.
- Designed analytical methodologies that improved data accuracy and processing efficiency, standardizing best practices across the research team.
- Presented research findings at conferences, translating complex data into accessible insights.

Hospital Corpsman 2nd Class, Quality Management – U.S. Navy, Naval Medical Center San Diego

(Dec 2018 – Apr 2020)

- Led data modernization project, transitioning from outdated legacy tracking systems to a new digital platform; improved HEDIS metrics by 60% through data-driven process redesign and performance monitoring.
- Analyzed performance data and designed optimization strategies that increased training readiness metrics from 60% → 95% within one month, demonstrating ability to drive measurable business outcomes.
- Supervised 2 junior staff; mentored and trained them, resulting in promotions.
- Recognized with Navy Achievement Medal and multiple performance awards.

Hospital Corpsman 3rd Class – U.S. Navy, Naval Medical Center San Diego

(Aug 2016 – Dec 2018)

- Maintained data accuracy and trained staff on documentation procedures, ensuring compliance with organizational standards.

Boatswain's Mate 3rd Class – U.S. Navy, USS Porter (DDG 78)

(Dec 2012 – Aug 2016)

- Managed project data and scheduling for 25+ personnel, tracking task completion and ensuring on-time delivery of mission-critical operations.

EDUCATION & CERTIFICATIONS

- **University of Pittsburgh** (Expected 2027)
Master of Science – Data Science
Relevant Coursework - Machine Learning, Statistical Analysis, Database Systems
- **Kent State University** (May 2024)
Bachelor of Science – Organismal Biology
Cum laude, GPA: 3.6/4.0
Associate of Science – Biology
GPA: 3.5/4.0
- Lean Six Sigma Yellow Belt (2019)
- Project Management Performance Excellence (2019)

AWARDS

- Navy Achievement Medal (x4), Navy Good Conduct Medal (x2) – Leadership and performance excellence
- Departmental Award for Significant Academic Achievement – Kent State University, 2024
